New Canaan, Connecticut 06840

Dear Mr. Hobbs:

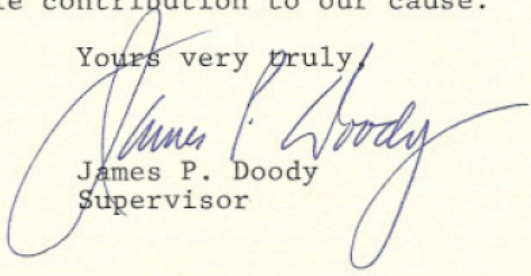

On behalf of the Town of Eastchester, I write to express my congratulations and sincere thanks for the excellent presentation you made in testimony before the U.S. Army Corps of Engineers at their recent public hearing on the proposed Sound Cable Project.

Your facts were well organized and most impressive and I believe your findings and conclusions about the potential hazards of bringing this cable through area rock formations will have a definite positive impact upon the Corps.

I know that your client, the residents who constitute the Avon Association, have been well served by your thoughtful analysis. Many others who were at the hearing remarked to me that on the basis of your testimony alone they strongly believed the Army Corps should order a further environmental impact study.

Many thanks for your valuable contribution to our cause.

Yours very truly,

  
James P. Doody  
Supervisor
